Location: Kollam, Kerala, India
GitHub: github.com/nadiyasherief186arc

PROFILE SUMMARY

Computer Science graduate with in-depth knowledge in Manual Testing, Automation Testing, Core Java, Selenium WebDriver, TestNG, Page Object Model (POM), Maven, SQL, JMeter, Postman, Git and GitHub. Skilled in writing and executing test cases, scenario design, defect lifecycle reporting, and web element interaction automation. Familiar with SDLC, STLC, Agile Scrum methodology, and defect tracking using JIRA. Seeking a Software Testing role to apply my skills, deliver robust test coverage, and gain hands-on industry experience.

TECHNICAL SKILLS

Automation Testing

Selenium WebDriver | Core Java (OOPs) | Page Object Model | TestNG | Maven | Cucumber | Playwright

Manual Testing

Agile Methodology | STLC & SDLC | Defect Life Cycle | Test Case Design | Scenario Design | Smoke & Sanity | Functional Testing | UI / Compatibility

API & Performance

API Testing - Postman | Performance - JMeter

Database & Tools

SQL Queries | Bug Tracking - JIRA | Excel Test Matrix | Git & GitHub

EDUCATION & CERTIFICATION

3-Month Offline Software Testing
Zoople Technologies, Kochi
`08/2026 - 11/2026`

B.Tech in Computer Science
Musaliar College of Engineering, Pathanamthitta
`2004 - 2008`

EXPERIENCE

Software Testing • Fresher
Hands-on Academic & Framework Projects
`Ready for Industry Roles`

PROJECTS

1. OrangeHRM — Automation Project

AUTOMATION

`Tech: TestNG, Java, Selenium WebDriver, Maven, POM, Playwright TS`

- Developed an end-to-end automation framework using Page Object Model (POM) and TestNG.
- Applied core OOP concepts including classes, objects, inheritance, encapsulation, abstraction, polymorphism, constructors, and static members.
- Automated comprehensive workflows for Login, Admin, PIM, Leave, Dashboard, Recruitment, and Time modules.
- Implemented explicit waits and assertions to synchronize and validate login scenarios and data tables.

2. Automation Testing Practice

AUTOMATION

`Tech: Java, Selenium WebDriver, TestNG, Maven, Playwright, POM`

- Automated web application testing targeting dynamic web elements and complex user interactions.
- Implemented automation suites for Drag & Drop, Mouse Hover, Multiple Window Handling, Multiple File Upload, and Keyboard actions.
- Validated element states, sync timeouts, and form inputs using robust assertions.

3. OBS Automobiles Application — Manual Testing

MANUAL TESTING

`Tech: STLC, SDLC, SRS Analysis, JIRA Bug Tracking, Smoke & UI Testing`

- Analysed SRS requirement documents and authored comprehensive test cases for Customer, Service Provider, and Admin Modules.

- Executed manual test cases for Login, Registration, and booking functionalities in the Customer Module.
- Performed Smoke, Functional, and UI Testing; documented and tracked defects across the Defect Life Cycle using JIRA.

4. Sauce Demo (Swag Labs) E-Commerce — Manual Testing

MANUAL TESTING

`Tech: Requirement Analysis, Functional, Usability & Compatibility Testing`

- Analysed application requirements and designed test cases covering Login, Product Listing, Cart, and Checkout modules.
- Executed Functional, Performance, Usability, and Cross-Browser Compatibility test scenarios.
- Identified, logged, and documented defects with steps to reproduce and severity classification.
